Professional Summary

Highly effective Full Stack Engineer with a strong frontend core and proven backend and DevOps capabilities, increasingly focused on **AI-assisted software development**. Experienced in designing, building, and scaling production-grade web and mobile applications using modern JavaScript and Python ecosystems, while leveraging Large Language Models (LLMs) to accelerate development, improve code quality, and deliver intelligent features. Known for delivering clean, high-performance user interfaces, robust APIs, AI-enabled workflows, and reliable deployments while leading teams, mentoring developers, and collaborating cross-functionally with UI/UX, QA, and DevOps. Adept at translating business requirements into scalable technical and AI-driven solutions.

Professional Experience

Full Stack Developer / Frontend Team Lead

Media Revolution SRL — Dominican Republic
Jan 2025 – Present

- Lead architecture and implementation for multiple client-facing applications, ensuring performance, scalability, and maintainability.
- Serve as Team Lead, establishing best practices for component design, state management, testing, and performance optimization.
- Develop and maintain full stack solutions using **React, Next.js, React Native, Express.js, FastAPI, MySQL, and PostgreSQL**.
- Design and integrate **AI-powered features** into production applications, including LLM-based workflows, intelligent automation, and data-driven user experiences.
- Build and expose backend services that interact with **AI/ML APIs** (e.g., prompt-based systems, inference endpoints, and asynchronous processing pipelines).
- Collaborate closely with DevOps teams on **CI/CD pipelines, containerization, and cloud deployments**, including AI-enabled services.

- Partner with QA teams to enforce quality standards, test coverage, and smooth release cycles for both traditional and AI-assisted features.
- Mentor junior developers through code reviews, technical guidance, and structured feedback, accelerating team productivity.
- Actively use **AI coding assistants** (ChatGPT, Claude Code, GitHub Copilot, Supermaven, DeepSeek, OpenCode) to:
    - Accelerate feature development and prototyping
    - Improve code quality through reviews and refactoring
    - Generate and validate test cases, edge cases, and documentation
    - Explore architectural alternatives and performance optimizations

Full Stack Developer

Innovativity / Global Tech Solutions (GTS) — Remote (Italy / Dominican Republic)
Nov 2024 – Jan 2025

- Developed and maintained cross-platform applications using **Vue.js, Python, QT**, and **Dockerized environments**.
- Designed and integrated RESTful APIs and optimized **MySQL** queries for performance and reliability.
- Contributed to mobile and desktop development initiatives.
- Supported team growth by training interns and improving internal development workflows.

IT Applications Support / Frontend-Focused Developer

ATDEV — Dominican Republic
Aug 2023 – Nov 2024

- Maintained and enhanced internal platforms using **Vue.js, jQuery, 11ty**, and **Bit microfrontend architecture**.
- Implemented automated testing strategies with **Cypress** and **Vitest**, improving application stability and confidence in releases.
- Integrated third-party services including **Zapier, Semrush, and Ahrefs** to streamline marketing and operational workflows.
- Collaborated closely with **UI/UX designers and QA engineers** to deliver polished, user-centered interfaces.
- Built backend features using **NestJS** and **Supabase**, supporting scalable internal tools.

Technical Skills

AI-Assisted Development & LLM Tooling
ChatGPT, Claude Code, GitHub Copilot, Supermaven, DeepSeek, OpenCode, Prompt Engineering, AI Pair Programming, LLM-Based Automation

Frontend Engineering
React.js, Next.js, Vue.js, 11ty, jQuery, Tailwind CSS, Bootstrap, Bit Microfrontend, Responsive Design, Performance Optimization

Backend Engineering
Python (FastAPI, Django), Node.js, Express.js, NestJS, RESTful APIs, Authentication, Data Modeling

Mobile & Desktop
React Native, Ionic, QT

Databases
MySQL, PostgreSQL, MongoDB, Redis, Supabase

DevOps & Cloud
Docker, Linux, Bash, CI/CD Automation

Testing & Quality
Cypress, Playwright, Vitest, TDD Principles

Tooling & Collaboration
GitHub, Notion, Slack, DecapCMS, AI-Assisted Code Review, AI-Driven Documentation

Development Practices
Agile/Scrum, OOP, Domain-Driven Design (DDD), Clean Architecture

---

Leadership & Impact

- Frontend Technical Leadership
- Developer Mentorship & Code Reviews
- Cross-Functional Collaboration (UI/UX, QA, DevOps)
- Strong Ownership Mentality
- Critical Thinking & Problem Solving
- Fast Learner with High Adaptability

Education

Higher Technician in Software Development
Instituto Tecnológico de Las Américas (ITLA) — Dominican Republic

Key Focus Areas: - Full Stack Web Development - Database Design & API Architecture - Agile Methodologies (Scrum, Kanban) - Modern JavaScript & Python Stacks - Cloud Deployment (AWS, Azure fundamentals)

Certifications

Google (Coursera) - Foundations of User Experience (UX) Design
Google (Coursera) - Start the UX Design Process
Google (Coursera) - Build Dynamic User Interfaces (UI) for Websites

---

Languages

- Spanish — Native
- English — Professional
